

## Job Description

---

Job Title: **Bilingual/Bicultural** Spanish-Speaking Psychological Assistant (Los Gatos, San Jose, Gilroy and Salinas areas). *Will also consider applications from English-speaking only applicants, with priority given to bilingual applicants. Duties of such a position will be similar, without expectation of Spanish-Speaking ability. Ability to speak Vietnamese, Mandarin, or Tagalog is considered a plus.*

FLSA Status: part-time or full-time available

Department: RehabOne Programs

Reports To: Director of Behavioral Medicine

---

### **Basic Function**

Psychotherapist will be competent to perform the following functions fully in Spanish and English: initial assessments and understanding of chronic pain clients, the cultural nuances of the Spanish speaking clients being able to convey cultural information relevant to treatment to the team, psycho-education for chronic pain clients, cognitive behavioral therapy and stress management groups, individual and family counseling, and working as an equal member within an interdisciplinary team in a medical clinic.

### **Responsibilities**

Psychotherapist will be responsible for the following duties:

- Individual, and group counseling sessions with Medicare, and worker's compensation patients
- Interviewing and assessing consultation clients
- Completing timely consult, progress and discharge reports on clients

### **Skills**

- \* Goal Setting
- \* Fully fluent in English and Spanish (speaking, reading, writing)
- \* Time Management
- \* Interdisciplinary Team Player
- \* Professionalism
- \* Psychological Assessment and Report Generation
- \* Excellent written and verbal skills
- \* Compassionate
- \* Computer Literacy

### **Education/Training**

Minimum Educational Requirement: eligibility to become a registered Psychological Assistant (possess a doctorate in psychology and have completed predoctoral hours) by the Board of Psychology, and good knowledge of cognitive behavioral therapy, education and/or training in working with Spanish speaking populations.

### **Experience:**

Require psychotherapy experience with Spanish speaking populations with groups and individuals.

Understanding of, or willingness to learn, electronic health record entry.

Prefer some experience working with minority and under privileged clients, and those with chronic pain, and/or trauma.

**Supervision:**

One hour weekly, face-to-face, individual supervision (multicultural emphasis)

Two hours weekly Team Meeting (integrated with physicians, physical therapists, vocational therapists)

One hour weekly group supervision

Monthly Behavior Medicine Grand Rounds
