

Post-doctoral Fellow Psychologist (Ph.D., PsyD)

We are seeking post-doctoral psychologist fellows to join our team at Seesaw Psychology Group.

We are interested in skilled trainees who will specialize in serving a pediatric population and who are seeking training and supervision for neuropsychological assessment, evidence-based treatment and consultation with families and schools.

Primary Clinical Activities:

- 1 Provide evidence-based interventions: Seesaw clinicians provide effective interventions for children and adolescents across multiple modalities including behavior therapy/CBT, social skills coaching, mindfulness, parent coaching and school consultation. Services are provided in individual, dyadic, family, and group formats, which includes social emotional learning classes and playgroups.
- 2 Conduct comprehensive evaluation: Interns and fellows will conduct integrated assessments to address a range of referral questions about ADHD, learning disorders, autism spectrum, anxiety, mood disorders, and developmental delay.

Candidate Requirements:

Candidates must have completed their doctoral training (Ph.D., PsyD) from university clinical science and scientist-practitioner training programs.

Clinical or School Psychology doctoral training and 1-2 years of working knowledge of cognitive, academic, behavioral, social-emotional and infant-toddler developmental assessment and evidence-based interventions (i.e., CBT, SEL, ABA).

To Apply:

Submit the following application materials to Dr. Sabrina Gabel, Clinic Director.

- 1 C.V.
- 2 Sample psycho-diagnostic or psycho-educational report (de-identified)
- 3 Treatment summary or therapy progress note (de-identified)
- 4 Two references
- 5 Two letters of recommendation
- 6 Cover letter describing experience with assessment and evidence-based therapies.

Highly competitive stipend. Small, collaborative multi-disciplinary team.
